NAME

    libssh2_channel_get_exit_status - get the remote exit code

SYNOPSIS

    #include <libssh2.h>

    int
    libssh2_channel_get_exit_status(LIBSSH2_CHANNEL* channel)

DESCRIPTION

    channel - Closed channel stream to retrieve exit status from.

    Returns the exit code raised by the process running on the remote host at the other end of the named channel. Note that the exit status may not be available if the remote end has not yet set its status to closed.

RETURN VALUE

    Returns 0 on failure, otherwise the *Exit Status* reported by remote host
