

**NAME**

libssh2\_channel\_set\_blocking - set or clear blocking mode on channel

**SYNOPSIS**

```
#include <libssh2.h>
```

```
void
```

```
libssh2_channel_set_blocking(LIBSSH2_CHANNEL *channel, int blocking);
```

**DESCRIPTION**

*channel* - channel stream to set or clean blocking status on.

*blocking* - Set to a non-zero value to make the channel block, or zero to make it non-blocking.

Currently this is a short cut call to **libssh2\_session\_set\_blocking(3)** and therefore will affect the session and all channels.

**RETURN VALUE**

None
