NAME

　　　libssh2_channel_window_write_ex - Check the status of the write window

SYNOPSIS

　　　#include <libssh2.h>

　　　unsigned long
　　　libssh2_channel_window_write_ex(LIBSSH2_CHANNEL *channel,
　　　　　　　　　　　unsigned long *window_size_initial)

DESCRIPTION

　　　Check the status of the write window Returns the number of bytes which may be safely written on the channel without blocking. 'window_size_initial' (if passed) will be populated with the size of the initial window as defined by the channel_open request

RETURN VALUE

　　　Number of bytes which may be safely written on the channel without blocking.
