

NAME

libssh2_knownhost_writefile - write a collection of known hosts to a file

SYNOPSIS

```
#include <libssh2.h>
```

```
int
```

```
libssh2_knownhost_writefile(LIBSSH2_KNOWNHOSTS *hosts,  
                             const char *filename, int type);
```

DESCRIPTION

Writes all the known hosts to the specified file using the specified file format.

filename specifies what filename to create

type specifies what file type it is, and *LIBSSH2_KNOWNHOST_FILE_OPENSSSH* is the only currently supported format.

RETURN VALUE

Returns a regular libssh2 error code, where negative values are error codes and 0 indicates success.

AVAILABILITY

Added in libssh2 1.2
