

NAME

libssh2_publickey_add - convenience macro for *libssh2_publickey_add_ex(3)* calls

SYNOPSIS

```
#include <libssh2.h>
```

```
int
```

```
libssh2_publickey_add(LIBSSH2_PUBLICKEY *pkey,  
    const unsigned char *name,  
    const unsigned char *blob, unsigned long blob_len,  
    char overwrite, unsigned long num_attrs,  
    const libssh2_publickey_attribute attrs[]);
```

DESCRIPTION

This is a macro defined in a public libssh2 header file that is using the underlying function *libssh2_publickey_add_ex(3)*.

RETURN VALUE

See *libssh2_publickey_add_ex(3)*

ERRORS

See *libssh2_publickey_add_ex(3)*

SEE ALSO
