NAME

logname - display user's login name

SYNOPSIS

logname

DESCRIPTION

The **logname** utility writes the user's login name to standard output followed by a newline.

The **logname** utility explicitly ignores the LOGNAME and USER environment variables because the environment cannot be trusted.

EXIT STATUS

The **logname** utility exits 0 on success, and >0 if an error occurs.

SEE ALSO

who(1), whoami(1), getlogin(2)

STANDARDS

The **logname** utility is expected to conform to IEEE Std 1003.2 ("POSIX.2").

HISTORY

The **logname** command appeared in 4.4BSD.
