

## NAME

lpinfo - show available devices or drivers (deprecated)

## SYNOPSIS

```
lpinfo [ -h server[:port] ] [ -E ] [ -l ] [ --device-id device-id-string ] [ --exclude-schemes scheme-list ] [ --include-schemes scheme-list ] [ --language locale ] [ --make-and-model name ] [ --product name ] -m  
lpinfo [ -h server[:port] ] [ -E ] [ -l ] [ --exclude-schemes scheme-list ] [ --include-schemes scheme-list ] [ --timeout seconds ] -v
```

## DESCRIPTION

**lpinfo** lists the available devices or drivers known to the CUPS server. The first form (*-m*) lists the available drivers, while the second form (*-v*) lists the available devices.

## OPTIONS

**lpinfo** accepts the following options:

**-E** Forces encryption when connecting to the server.

**-h** *server[:port]*

Selects an alternate server. Note: This option must occur before all others.

**-l** Shows a "long" listing of devices or drivers.

**--device-id** *device-id-string*

Specifies the IEEE-1284 device ID to match when listing drivers with the *-m* option.

**--exclude-schemes** *scheme-list*

Specifies a comma-delimited list of device or PPD schemes that should be excluded from the results. Static PPD files use the "file" scheme.

**--include-schemes** *scheme-list*

Specifies a comma-delimited list of device or PPD schemes that should be included in the results. Static PPD files use the "file" scheme.

**--language** *locale*

Specifies the language to match when listing drivers with the *-m* option.

**--make-and-model** *name*

Specifies the make and model to match when listing drivers with the *-m* option.

**--product** *name*

Specifies the product to match when listing drivers with the *-m* option.

**--timeout** *seconds*

Specifies the timeout when listing devices with the *-v* option.

**CONFORMING TO**

The *lpinfo* command is unique to CUPS.

**EXAMPLES**

List all devices:

```
lpinfo -v
```

List all drivers:

```
lpinfo -m
```

List drivers matching "HP LaserJet":

```
lpinfo --make-and-model "HP LaserJet" -m
```

**NOTES**

CUPS printer drivers and backends are deprecated and will no longer be supported in a future feature release of CUPS. Printers that do not support IPP can be supported using applications such as **ippeveprinter(1)**.
