

Name

mariadb_connection - checks if the client is connected to a MariaDB database server

Synopsis

```
#include <mysql.h>
```

```
my_bool mariadb_connection(MYSQL * mysql);
```

Description

Checks if the client is connected to a MariaDB or MySQL database server.

Parameter

mysql - mysql handle, which was previously allocated by **mysql_init(3)** and connected by **mysql_real_connect(3)**.

Return value

Returns a non zero value if connected to a MariaDB database server, otherwise zero.
