

Name

mariadb_dyncol_list_named - Lists column keys in dynamic column

Synopsis

```
#include <mariadb_dyncol.h>

enum enum_dyncol_func_result
mariadb_dyncol_list_named(DYNAMIC_COLUMN *str,
                          uint *column_count,
                          MYSQL_LEX_STRING **column_keys);
```

Description

Lists the column keys inside a dynamic column.

Notes

- ⊕ The application program needs to free the allocated memory for column_count and column_keys parameter.

Parameter

- ⊕ *str - Dynamic column
- ⊕ *column_count - A pointer to an unsigned integer which stores the number of columns
- ⊕ **column_keys - A pointer to an array of column keys, which stores the keys

Return value

Returns ER_DYNCOL_OK on success, otherwise error.
