Name

mariadb_reconnect - reconnects to a server

Synopsis

#include <mysql.h>

my_bool mariadb_reconnect(MYSQL * mysql)

Description

mariadb_reconnect() tries to reconnect to a server in case the connection died due to timeout or other errors. It uses the same credentials which were specified in **mysql_real_connect(3)**.

Return value

The function will return 0 on sucess, a non zero value on error

Note: The function will return an error, if the option MYSQL_OPT_RECONNECT wasn't set before.

History

mariadb_reconnect() was added in MariaDB Connector/C 3.0
