

**Name**

mariadb\_rpl\_close - Closes replication stream

**Synopsis**

```
#include <mariadb_rpl.h>
```

```
void mariadb_rpl_close(MARIADB_RPL *rpl)
```

**Description**

Closes a replication stream.

**Parameter**

rpl - A replication handle which was initialized by **mariadb\_rpl\_init(3)** and connected by **mariadb\_rpl\_open(3)**.

**Notes**

To close the connection to the server, the api function **mariadb\_close(3)** must be called.

**History**

mariadb\_rpl\_close was added in MariaDB Connector/C 3.1
