Name

mariadb_rpl_close - Closes replication stream

Synopsis

#include <mariadb_rpl.h>

void mariadb_rpl_close(MARIADB_RPL *rpl)

Description

Closes a replication stream.

Parameter

rpl - A replication handle which was initialized by **mariadb_rpl_init(3)** and connected by **mariadb_rpl_open(3)**.

Notes

To close the connection to the server, the api function **mariadb_close(3)** must be called.

History

mariadb_rpl_close was added in MariaDB Connector/C 3.1
