

NAME

mate-control-center - Configure MATE settings

SYNOPSIS

mate-control-center [*OPTION...*]

DESCRIPTION

mate-control-center is a graphical user interface to configure various aspects of MATE.

When run without arguments, the shell displays the control center overview, which shows all available configuration panels. The overview allows one to open individual panels by clicking on them. It also has a search entry to find panels by searching keywords.

OPTIONS

-, --help

Print the application's help options and exit.

--help-gtk

Print GTK help options and exit.

--help-all

Print application and GTK help options and exit.

--hide

Hide on start (useful for preloading the shell).

--display=DISPLAY

X display to use.

This program additionally accepts the standard MATE and GTK options (as listed with *--help-gtk*).

EXIT STATUS

On success 0 is returned, a non-zero failure code otherwise.
