

NAME

mate-keyboard-properties - manage keyboard behaviour in MATE

SYNOPSIS

mate-keyboard-properties [*OPTIONS...*]

DESCRIPTION

This executable is part of the package 'mate-control-center': The MATE Control Center.

Keyboard Preferences manages all settings related to the keyboard in a MATE environment. This includes key repeat delay, cursor blinking, layouts and layout options. You can also configure a typing break which locks the screen and enforces a break from work.

OPTIONS**--apply**

Just apply settings and quit (compatibility only; now handled by daemon)

--init-session-settings

Just apply settings and quit (compatibility only; now handled by daemon)

--get-legacy

Retrieve and store legacy settings

--typing-break

Start the page with the typing break settings showing

This program also accepts the standard MATE and GTK options.

AUTHORS

This manual page was written by Mike Gabriel <mike.gabriel@das-netzwerkteam.de> for the Debian project (but may be used by others).
