

NAME

menu_request_by_name, **menu_request_name** - handle printable menu request names

SYNOPSIS

```
#include <menu.h>
```

```
const char *menu_request_name(int request);  
int menu_request_by_name(const char *name);
```

DESCRIPTION

The function **menu_request_name** returns the printable name of a menu request code.

The function **menu_request_by_name** searches in the name-table for a request with the given name and returns its request code. Otherwise **E_NO_MATCH** is returned.

RETURN VALUE

menu_request_name returns **NULL** on error and sets **errno** to **E_BAD_ARGUMENT**.

menu_request_by_name returns **E_NO_MATCH** on error. It does not set **errno**.

SEE ALSO

curses(3X), **menu(3X)**.

NOTES

The header file **<menu.h>** automatically includes the header file **<curses.h>**.

PORTABILITY

These routines are specific to ncurses. They were not supported on Version 7, BSD or System V implementations. It is recommended that any code depending on them be conditioned using **NCURSES_VERSION**.

AUTHORS

Juergen Pfeifer. Manual pages and adaptation for new curses by Eric S. Raymond.
