

**NAME**

msd-locate-pointer - create ripples around mouse pointer

**SYNOPSIS**

msd-locate-pointer

**DESCRIPTION**

The *msd-locate-pointer* utility is a program that creates ripples (like throwing a stone into water) around the mouse pointer. This helps to locate the position of the mousepointer.

With *mate-settings-daemon* it is possible to assign a hotkey for evoking the *msd-locate-pointer* command.
