

Name

mysql_errno - returns the last error code for the most recent function call

Synopsis

```
#include <mysql.h>
```

```
unsigned int mysql_errno(MYSQL * mysql);
```

Description

Returns the last error code for the most recent function call that can succeed or fail. Zero means no error occurred.

Parameter

- ⊕ mysql is a connection identifier, which was previously allocated by **mysql_init(3)** and connected by **mysql_real_connect(3)**.

Notes

- ⊕ Client error codes are listed in errmsg.h header file, server error codes are listed in mysqld_error.h header file of the server source distribution.
