

Name

mysql_get_host_info - Returns host information

Synopsis

```
#include <mysql.h>
const char * mysql_get_host_info(MYSQL * mysql);
```

Description

Describes the type of connection in use for the connection, including the server host name. Returns a string, or NULL if the connection is not valid.

Parameter

- ⊕ `mysql` - a connection identifier, which was previously allocated by **mysql_init(3)** and connected by **mysql_real_connect(3)**.

Return value

Returns a string, describing host information or NULL if the connection is not valid.
