

Name

mysql_get_server_version - returns numeric server version

Synopsis

```
#include <mysql.h>
```

```
unsigned long mysql_get_server_version(MYSQL * mysql);
```

Description

Returns an integer representing the version of connected server.

Parameter

- ⊕ mysql - a connection identifier, which was previously allocated by **mysql_init(3)** and connected by **mysql_real_connect(3)**.

Notes

The form of the version number is $VERSION_MAJOR * 10000 + VERSION_MINOR * 100 + VERSION_PATCH$.

Return value

The version number of the connected server
