

Name

mysql_rollback - Rolls back the current transaction

Synopsis

```
#include <mysql.h>
```

```
my_bool mysql_rollback(MYSQL * mysql);
```

Description

Rolls back the current transaction for the database. Returns zero on success, nonzero if an error occurred.

Parameter

- ⊕ mysql - a mysql handle, which was previously allocated by **mysql_init(3)** and connected by **mysql_real_connect(3)**.

Notes

- ⊕ mysql_rollback() will not work as expected if autocommit mode was set or the storage engine does not support transactions.
