Name

   mysql_stmt_field_count - Returns the number of fields in a result set

Synopsis

   #include <mysql.h>

   unsigned int mysql_stmt_field_count(MYSQL_STMT * stmt);

Description

   Returns the number of fields in a result set of a prepared statement.

Return value

   Number of fields or zero if the prepared statement has no result set.

Parameter

   ⊕ stmt - a statement handle, which was previously allocated by **mysql_stmt_init(3)**.

Notes

   ⊕ The number of fields will be available after calling **mysql_stmt_prepare(3)**

   ⊕ mysql_stmt_field_count() returns zero for statements which don't produce a result set.
