

Name

mysql_stmt_row_tell - Returns position of row cursor

Synopsis

```
#include <mysql.h>
```

```
MYSQL_ROW_OFFSET mysql_stmt_row_tell(MYSQL_STMT * stmt);
```

Description

Returns the row offset of a result cursor. The returned offset value can be used to reposition the result cursor by calling **mysql_stmt_row_seek(3)**.

Parameter

⊕ stmt - a statement handle, which was previously allocated by **mysql_stmt_init(3)**.

Return value

Returns the current position of the row cursor.

Notes

⊕ This function can be used for buffered result sets only, which can be obtained by executing the **mysql_stmt_store_result(3)** function.
