Name

mysql_stmt_warning_count - Returns the number of warnings from the last executed statement.

Synopsis

#include <mysql.h>

unsigned int mysql_stmt_warning_count(MYSQL_STMT * stmt);

Description

Returns the number of warnings from the last executed statement, or zero if there are no warnings. ## Parameter * stmt - a statement handle, which was previously allocated by **mysql_stmt_init(3)**.

Return value

Returns the number of warnings.

Notes

⊕ For retrieving warning messages you should use the SQL command SHOW WARNINGS.

⊕ If SQL_MODE TRADITIONAL is enabled an error instead of warning will be returned. For detailed information check the server documentation. ## History This function was added in Connector/C 3.0.
