

NAME

nfslockd - NFS advisory locking

SYNOPSIS

To compile this driver into the kernel, place the following lines in your kernel configuration file:

```
options NFSLOCKD
```

Alternatively, to load the driver as a module at boot time, place the following line in loader.conf(5):

```
nfslockd_load="YES"
```

DESCRIPTION

The **nfslockd** driver provides kernel support for NFSv3 advisory locking. It works in tandem with `rpc.lockd(8)`, which will normally load it on startup if it is not already loaded or compiled-in.

SEE ALSO

`rpc.lockd(8)`

HISTORY

The **nfslockd** driver first appeared in FreeBSD 6.4.

AUTHORS

The **nfslockd** driver was written by Doug Rabson <dfr@FreeBSD.org>.
