NAME

    ntlm_type2 -

SYNOPSIS

    #include <heimntlm.h>

  Data Fields
    uint32_t **flags**
char * **targetname**
struct **ntlm_buf targetinfo**
unsigned char **challenge** [8]
uint32_t **context** [2]
uint32_t **os** [2]

Detailed Description

    Struct for the NTLM type2 message info, the strings is assumed to be in UTF8. When filled in by the
    library it should be freed with **heim_ntlm_free_type2**().

    Examples:

    test_ntlm.c.

Field Documentation
  uint32_t ntlm_type2::flags
    Examples:
        test_ntlm.c.

  char* ntlm_type2::targetname
    Examples:
        test_ntlm.c.

  struct ntlm_buf ntlm_type2::targetinfo [read]
    Examples:
        test_ntlm.c.

  unsigned char ntlm_type2::challenge[8]
    Examples:
        test_ntlm.c.

  uint32_t ntlm_type2::context[2]

uint32_t ntlm_type2::os[2]
