

**NAME**

oLschema2ldif - Converts LDAP schema's to LDB-compatible LDIF

**SYNOPSIS**

**oLschema2ldif** [-I INPUT-FILE] [-O OUTPUT-FILE]

**DESCRIPTION**

oLschema2ldif is a simple tool that converts standard OpenLDAP schema files to a LDIF format that is understood by LDB.

**OPTIONS**

-I input-file

OpenLDAP schema to read. If none are specified, the schema file will be read from standard input.

-O output-file

File to write ldif version of schema to.

**VERSION**

This man page is correct for version 4.0 of the Samba suite.

**SEE ALSO**

ldb(7), ldbmodify, ldbdel, ldif(5)

**AUTHOR**

ldb was written by **Andrew Tridgell**[1]. oLschema2ldif was written by **Simo Sorce**[2].
