NAME

ohci - OHCI USB Host Controller driver

SYNOPSIS

device ohci

DESCRIPTION

The **ohci** driver provides support for OHCI-type PCI based USB controllers.

HARDWARE

The **ohci** driver supports all OHCI v1.0 compliant controllers including:

- AcerLabs M5237 (Aladdin-V)
- AMD-756
- OPTi 82C861 (FireLink)
- NEC uPD 9210
- CMD Tech 670 (USB0670)
- CMD Tech 673 (USB0673)
- NVIDIA nForce3

SYSCTL VARIABLES

The following variables are available as both sysctl(8) variables and loader(8) tunables:

hw.usb.ohci.debug

>   Debug output level, where 0 is debugging disabled and larger values increase debug message verbosity. Default is 0.

SEE ALSO

ehci(4), uhci(4), xhci(4)

HISTORY

The **ohci** device driver first appeared in FreeBSD 3.0.

AUTHORS

The **ohci** driver was written by Lennart Augustsson *<augustss@carlstedt.se>* for the NetBSD project.
