

NAME

openssl-version - print OpenSSL version information

SYNOPSIS

openssl version [-help] [-a] [-v] [-b] [-o] [-f] [-p] [-d] [-e] [-m] [-r] [-c]

DESCRIPTION

This command is used to print out version information about OpenSSL.

OPTIONS**-help**

Print out a usage message.

-a All information, this is the same as setting all the other flags.

-v The current OpenSSL version.

-b The date the current version of OpenSSL was built.

-o Option information: various options set when the library was built.

-f Compilation flags.

-p Platform setting.

-d OPENSSLDIR setting.

-e ENGINESDIR settings.

-m MODULESDIR settings.

-r The random number generator source settings.

-c The OpenSSL CPU settings info.

NOTES

The output of "openssl version -a" would typically be used when sending in a bug report.
