NAME

    otusfw - Firmware Module for AR9170 driver

SYNOPSIS

    To compile this module into the kernel, place the following line in your kernel configuration file:

        device otusfw

    This will include the firmware image, AR9170, inside the kernel. otus(4) will load the image into the chip.

    Alternatively, to load the firmware images as a module at boot time, place the following line in loader.conf(5):

        otusfw_init_load="YES"
        otusfw_main_load="YES"

DESCRIPTION

    This module provides the firmware for the Atheros AR9170 based USB WiFi adapters.
