NAME

pam_ftpusers - ftpusers PAM module

SYNOPSIS

[*service-name*] *module-type control-flag pam_ftpusers* [*options*]

DESCRIPTION

The *ftpusers* service module for PAM, **pam_ftpusers** provides functionality for only one PAM category: account management. In terms of the *module-type* parameter, this is the "account" feature.

Ftpusers Account Management Module

The *ftpusers* account management component (**pam_sm_acct_mgmt**()), succeeds if and only if the user is listed in */etc/ftpusers*.

The following options may be passed to the authentication module:

debug   syslog(3) debugging information at LOG_DEBUG level.

no_warn

  suppress warning messages to the user. These messages include reasons why the user's authentication attempt was declined.

disallow reverse the semantics; **pam_ftpusers** will succeed if and only if the user is not listed in */etc/ftpusers*.

SEE ALSO

ftpusers(5), pam.conf(5), pam(3)

AUTHORS

The **pam_ftpusers** module and this manual page were developed for the FreeBSD Project by ThinkSec AS and NAI Labs, the Security Research Division of Network Associates, Inc. under DARPA/SPAWAR contract N66001-01-C-8035 ("CBOSS"), as part of the DARPA CHATS research program.
