NAME

paperinfo, paperwithsize, paperfirst, paperlast, papernext, paperprev - return informations about a paper

SYNOPSYS

#include <paper.h>

const struct paper* paperinfo(const char* papername)
const struct paper* paperwithsize(double psw, double psh)

char* papername(const struct paper*)
double paperpswidth(const struct paper*)
double paperpsheigth(const struct paper*)

const struct paper* paperfirst(void) const struct paper* papernext(const struct paper* pinfo) const struct paper* paperprev(const struct paper* pinfo) const struct paper* paperlast(void)

DESCRIPTION

paperinfo() returns a pointer to a **struct paper** containing informations about the paper with name **paperwithsize**() looks for a paper whose width and height is **psw** and **psh** in PostScript points, and return a pointer to a **struct paper** corresponding to the paper found.

papername() returns the name of a paper described by an opaque struct paper object paperpswidth()
returns the width, in PostScript points, of a paper described by an opaque struct paper object
paperpsheight() returns the height, in PostScript points, of a paper described by an opaque struct paper
object

paperfirst() and **paperlast**() return the first and last entries for papers. Iteration from one entry to the next or the previous one can be done with **papernext**() and **paperprev**() respectively.
