

NAME

`pcap_dump_flush` - flush to a savefile packets dumped

SYNOPSIS

```
#include <pcap/pcap.h>
```

```
int pcap_dump_flush(pcap_dumper_t *p);
```

DESCRIPTION

`pcap_dump_flush()` flushes the output buffer to the “savefile,” so that any packets written with `pcap_dump(3)` but not yet written to the “savefile” will be written.

RETURN VALUE

`pcap_dump_flush()` returns **0** on success and **PCAP_ERROR** on failure.

SEE ALSO

`pcap(3)`, `pcap_dump_open(3)`
