NAME

    pcap_freecode - free a BPF program

SYNOPSIS

    #include <pcap/pcap.h>

    void pcap_freecode(struct bpf_program *);

DESCRIPTION

    pcap_freecode() is used to free up allocated memory pointed to by a *bpf_program* struct generated by **pcap_compile**(3) when that BPF program is no longer needed, for example after it has been made the filter program for a pcap structure by a call to **pcap_setfilter**(3).
