

**NAME**

PCRE2 - Perl-compatible regular expressions (revised API)

**SYNOPSIS**

```
#include <pcre2.h>
```

```
int pcre2_set_recursion_memory_management(  
    pcre2_match_context *mcontext,  
    void *(*private_malloc)(PCRE2_SIZE, void *),  
    void (*private_free)(void *, void *), void *memory_data);
```

**DESCRIPTION**

From release 10.30 onwards, this function is obsolete and does nothing. The result is always zero.

There is a complete description of the PCRE2 native API in the **pcre2api** page and a description of the POSIX API in the **pcre2posix** page.
