

NAME

Pluma - The MATE Text Editor

SYNOPSIS

pluma [**OPTIONS...**] [**FILES...**]

DESCRIPTION

Pluma is the official text editor of the MATE desktop environment. While aiming at simplicity and ease of use, Pluma is a powerful general purpose text editor. It can be used to create and edit all sorts of text files.

Pluma features a flexible plugin system which can be used to dynamically add new advanced features to Pluma itself.

This manual page briefly documents the **pluma** command.

OPTIONS**filename(s)...**

Specifies the file to open when **pluma** starts. If this is not specified, **pluma** will start a new, blank file with an "Unsaved Document" label. Multiple files can be loaded if they are separated by spaces. **pluma** also supports handling of remote files.

--display=DISPLAY

X display to use.

--encoding

Set the character encoding to be used for opening the files listed on the command line.

--new-window

Create a new toplevel window in an existing instance of **pluma**.

--new-document

Create a new document in an existing instance of **pluma**, on the last Pluma window that had focus.

+[num]****

For the first file, go to the line specified by "num" (do not insert a space between the "+" sign and the number). If "num" is missing, go to the last line.

--list-encodings

Display list of possible values for the encoding option and exit

--version

Output version information and exit

-, -h, --help

Print standard command line options.

--help-all

Print all command line options.

This program also accepts the standard GTK options.

EXAMPLES

pluma --encoding WINDOWS-1252 ftp://ftp.kernel.org/pub/linux/kernel/README

Open the Linux Kernel README file from kernel.org's FTP server using Windows-1252 character encoding.

pluma +156 http://mate-desktop.org/

Open the main web page of mate-desktop.org and jump to line 156.

pluma --new-window ~/.bashrc ~/.bash_history

Open the current users .bashrc and .bash_history files in a new Pluma window.

BUGS

Should you encounter any bugs, they may be reported at:

<http://github.com/mate-desktop/pluma/issues>

NOTES

This version of the Pluma Manual Page was written with Pluma. =)

AUTHORS

This Man Page has been updated/re-written for the MATE Desktop Environment by:

Adam Erdman <hekel@archlinux.info> (2014)

HISTORY

Some portions of this manual were originally written by Gedit's previous developers, to accompany it in the GNOME Desktop Environment by:

Paolo Maggi <paolo@gnome.org>
Paolo Borelli <pborelli@katamail.com>
James Willcox <jwillcox@gnome.org>
Federico Mena Quintero <federico@novell.com>
Chema Celorio
(2000-2010)

SEE ALSO

Pluma documentation can be found from the "Help" menu, or by pressing the F1 key.
