

NAME

pmap_release - release resources held by a physical map

SYNOPSIS

```
#include <sys/param.h>
```

```
#include <vm/vm.h>
```

```
#include <vm/pmap.h>
```

void

```
pmap_release(pmap_t pmap);
```

DESCRIPTION

The **pmap_release**() function releases any resources held by the physical map *pmap*. This function is called when a pmap initialized by the corresponding function, **pmap_pinit**() is being released.

IMPLEMENTATION NOTES

This function should only be called if *pmap* no longer contains any valid mappings.
