

**NAME**

ps2pdfwr - Convert PostScript to PDF without specifying CompatibilityLevel, using ghostscript

**SYNOPSIS**

**ps2pdfwr** [options...] {input.[e]ps|-} [output.pdf|-]

**DESCRIPTION**

This wrapper script invokes **gs**(1) with following arguments

**-q -dNOPAUSE -dBATCH -sDEVICE=pdfwrite**

as well as the appropriate **-dOutputFile** argument, all preceded and followed by any command-line arguments. Finally, the security option **-dSAFER** is prepended before all the other options (This is now redundant as "SAFER" is now the default, but the option does no harm).

The version-specific **ps2pdf** scripts all invoke this one with the addition of the respective compatibility level option.

**SEE ALSO**

gs(1), ps2pdf(1)

**VERSION**

This document was last revised for Ghostscript version 10.03.1.
