NAME

rpc_gss_get_mech_info - Get extra information about a security mechanism

LIBRARY

RPC GSS-API Authentication Library (librpcsec_gss, -lrpcsec_gss)

SYNOPSIS

#include <rpc/rpcsec_gss.h>

*const char ***
rpc_gss_get_mech_info(*const char *mech*, *rpc_gss_service_t *service*);

DESCRIPTION

This function looks up a mechanism by name by reading the file /etc/gss/mech and queries it for its capabilities.

PARAMETERS

mech   The mechanism to search for

service If the mechanism is found, the maximum supported service type is returned in **service*

RETURN VALUES

If the mechanism is found, a list of the supported qualities of protection is returned, otherwise NULL.

SEE ALSO

gssapi(3), rpc(3), rpcsec_gss(3)

HISTORY

The **rpc_gss_get_mech_info** function first appeared in FreeBSD 8.0.
