

NAME

rpc_gss_mech_to_oid - Convert a mechanism name to a GSS-API oid

LIBRARY

RPC GSS-API Authentication Library (librpcsec_gss, -lrpcsec_gss)

SYNOPSIS

```
#include <rpc/rpcsec_gss.h>
```

bool_t

```
rpc_gss_mech_to_oid(const char *mech, gss_OID *oid_ret);
```

DESCRIPTION

This function looks up a mechanism by name by reading the file /etc/gss/mech.

PARAMETERS

mech The mechanism name to search for

oid_ret If the mechanism is found, the corresponding GSS-API oid is returned in **oid_ret*

RETURN VALUES

If the mechanism is found, TRUE is returned, otherwise FALSE.

SEE ALSO

gssapi(3), rpc(3), rpcsec_gss(3)

HISTORY

The **rpc_gss_mech_to_oid** function first appeared in FreeBSD 8.0.
