NAME
rpc_gss_set_defaults - set service and quality of protection

LIBRARY
RPC GSS-API Authentication Library (librpcsec_gss, -lrpcsec_gss)

SYNOPSIS
#include <rpc/rpcsec_gss.h>

bool_t
rpc_gss_set_defaults(*AUTH *auth*, *rpc_gss_service_t service*, *const char *qop*);

DESCRIPTION
Set the service and quality of protection to be used for RPC requests. The new values apply for the rest
of the lifetime of the context (unless changed again with this function).

PARAMETERS
service The service type to use for subsequent RPC requests

qop   The quality of protection to use or NULL for the default

RETURN VALUES
Returns TRUE if the values were set.

SEE ALSO
gssapi(3), rpc(3), rpcsec_gss(3)

HISTORY
The **rpc_gss_set_defaults** function first appeared in FreeBSD 8.0.
