

NAME

ldbadd - Command-line utility for adding records to an LDB

SYNOPSIS

ldbadd [-h] [-H LDB-URL] [ldif-file1] [ldif-file2] [...]

DESCRIPTION

ldbadd adds records to an ldb(3) database. It reads the ldif(5) files specified on the command line and adds the records from these files to the LDB database, which is specified by the -H option or the LDB_URL environment variable.

If - is specified as a ldb file, the ldif input is read from standard input.

OPTIONS

-h

Show list of available options.

-H <ldb-url>

LDB URL to connect to. See ldb(3) for details.

ENVIRONMENT

LDB_URL

LDB URL to connect to (can be overridden by using the -H command-line option.)

VERSION

This man page is correct for version 1.1 of LDB.

SEE ALSO

ldb(3), ldbmodify, ldbdel, ldif(5)

AUTHOR

ldb was written by **Andrew Tridgell**[1].
