NAME

sasl_global_listmech - Cyrus SASL documentation

SYNOPSIS

#include <sasl/sasl.h>

const char ** sasl_global_listmech();

DESCRIPTION

const char **sasl_global_listmech();
>   **sasl_global_listmech** returns a null-terminated array of strings that lists all mechanisms that are loaded by either the client or server side of the library.

RETURN VALUE

Returns a pointer to the array on success. NULL on failure (sasl library uninitialized).

SEE ALSO
