NAME

stringprep_convert - API function

SYNOPSIS

#include <stringprep.h>

char * stringprep_convert(const char * *str***, const char *** *to_codeset***, const char *** *from_codeset***);**

ARGUMENTS

const char * str

> input zero-terminated string.

const char * to_codeset

> name of destination character set.

const char * from_codeset

> name of origin character set, as used by *str* .

DESCRIPTION

Convert the string from one character set to another using the system's **iconv()** function.

Return value: Returns newly allocated zero-terminated string which is *str* transcoded into to_codeset.
