

NAME

sysdecode_sctp_sinfo_flags - output textual description of the `sinfo_flags` field of struct `sctp_sndrcvinfo`

LIBRARY

System Argument Decoding Library (`libsysdecode`, `-lsysdecode`)

SYNOPSIS

```
#include <sysdecode.h>
```

void

```
sysdecode_sctp_sinfo_flags(FILE *fp, int sinfo_flags);
```

DESCRIPTION

The `sysdecode_sctp_sinfo_flags()` function outputs a textual description of the `sinfo_flags` member of a `struct sctp_sndrcvinfo` to the stream `fp`. In particular, the embedded PR-SCTP policies are handled.
