

NAME

sysdecode_socket_protocol - lookup name of socket protocol

LIBRARY

System Argument Decoding Library (libsysdecode, -lsysdecode)

SYNOPSIS

```
#include <sysdecode.h>
```

```
const char *
```

```
sysdecode_socket_protocol(int domain, int protocol);
```

DESCRIPTION

The **sysdecode_socket_protocol()** function returns a text description of the protocol passed in the *protocol* argument to **socket(2)**. **sysdecode_socket_protocol()** takes the *protocol* as well as the *domain* to uniquely identify the protocol.
