NAME

tcsetpgrp - set foreground process group ID

LIBRARY

Standard C Library (libc, -lc)

SYNOPSIS

#include <unistd.h>

int

tcsetpgrp(*int fd*, *pid_t pgrp_id*);

DESCRIPTION

If the process has a controlling terminal, the **tcsetpgrp**() function sets the foreground process group ID associated with the terminal device to $pgrp_id$. The terminal device associated with fd must be the controlling terminal of the calling process and the controlling terminal must be currently associated with the session of the calling process. The value of $pgrp_id$ must be the same as the process group ID of a process in the same session as the calling process.

RETURN VALUES

The **tcsetpgrp**() function returns the value 0 if successful; otherwise the value -1 is returned and the global variable *errno* is set to indicate the error.

ERRORS

The **tcsetpgrp**() function will fail if:

[EBADF] The fd argument is not a valid file descriptor.

[EINVAL] An invalid value of *pgrp_id* was specified.

[ENOTTY] The calling process does not have a controlling terminal, or the file represented by

fd is not the controlling terminal, or the controlling terminal is no longer

associated with the session of the calling process.

[EPERM] The pgrp_id argument does not match the process group ID of a process in the

same session as the calling process.

SEE ALSO

setpgid(2), setsid(2), tcgetpgrp(3)

STANDARDS

The **tcsetpgrp**() function is expected to be compliant with the IEEE Std 1003.1-1988 ("POSIX.1") specification.
