

NAME

uathload - firmware loader for Atheros USB wireless driver

SYNOPSIS

uathload [-v] -d *ugen-device* [*firmware-file*]

DESCRIPTION

The **uathload** utility provides a way to load the firmware for Atheros USB wireless devices with AR5005UG and AR5005UX chipsets.

The following options are accepted.

-d *ugen-device*

Use a specific ugen(4) device.

-v Enable debugging messages.

If *firmware-file* is specified **uathload** tries to load it instead of the built-in firmware image.

EXAMPLES

Load the built-in firmware image into a specific ugen(4) device:

```
uathload -d /dev/ugen0.2
```

SEE ALSO

uath(4)
