## **NAME**

valloc - aligned memory allocation function

## **LIBRARY**

```
Standard C Library (libc, -lc)
```

## **SYNOPSIS**

```
#include <unistd.h>
```

```
void *
```

valloc(size\_t size);

#### DESCRIPTION

The **valloc()** function is obsoleted by posix\_memalign(3), which can be used to request page-aligned allocations.

The **valloc**() function allocates *size* bytes aligned on a page boundary.

#### **RETURN VALUES**

The **valloc()** function returns a pointer to the allocated space if successful; otherwise a null pointer is returned.

# **SEE ALSO**

posix\_memalign(3)

## **HISTORY**

The **valloc**() function appeared in 3.0BSD.

The **valloc**() function correctly allocated memory that could be deallocated via **free**() starting in FreeBSD 7.0.
