

NAME

virtio_random - VirtIO Entropy driver

SYNOPSIS

To compile this driver into the kernel, place the following lines in your kernel configuration file:

```
device virtio_random
```

Alternatively, to load the driver as a module at boot time, place the following line in loader.conf(5):

```
virtio_random_load="YES"
```

DESCRIPTION

The **virtio_random** device driver provides support for VirtIO entropy devices.

The entropy device supplies high-quality randomness from the hypervisor to the guest.

SEE ALSO
