

NAME

webpinfo - print out the chunk level structure of WebP files along with basic integrity checks.

SYNOPSIS

webpinfo *OPTIONS INPUT*

webpinfo [-h|-help|-H|-longhelp]

DESCRIPTION

This manual page documents the **webpinfo** command.

webpinfo can be used to print out the chunk level structure and bitstream header information of WebP files. It can also check if the files are of valid WebP format.

OPTIONS**-version**

Print the version number (as major.minor.revision) and exit.

-quiet

Do not show chunk parsing information.

-diag

Show parsing error diagnosis.

-summary

Show chunk stats summary.

-bitstream_info

Parse bitstream header.

-h, -help

A short usage summary.

-H, -longhelp

Detailed usage instructions.

INPUT

Input files in WebP format. Input files must come last, following options (if any). There can be

multiple input files.

BUGS

Please report all bugs to the issue tracker: <https://bugs.chromium.org/p/webp>
Patches welcome! See this page to get started:
<https://www.webmproject.org/code/contribute/submitting-patches/>

EXAMPLES

```
webpinfo -h
webpinfo -diag -summary input_file.webp
webpinfo -bitstream_info input_file_1.webp input_file_2.webp
webpinfo *.webp
```

AUTHORS

webpinfo is a part of libwebp and was written by the WebP team.

The latest source tree is available at <https://chromium.googlesource.com/webm/libwebp>

This manual page was written by Hui Su <huisu@google.com>, for the Debian project (and may be used by others).
